Subject: 2016 SDWIS Data Quality Status Report: Part 1
Attachments: 2016.SDWIS Data Quality Report_2016_final_1-4 (3).docx

This email transmits an electronic copy of the 2016 EPA Region 9 SDWIS Data Quality Status Report (Report) to enable access to specific tables embedded in the Report. You will be receiving the Report in two parts due to file size. Part 1 focuses on PWSS program management. Part 2 presents two tools for assessing program rule implementation as it relates to data management and reporting.

The Report summarizes key indicators of SDWIS data quality as part of EPA Region 9's oversight responsibility. Based on data from the January 2016 SDWIS/Fed database and other sources, the Report describes the status of SDWIS data management performance capabilities in each primacy agency, includes recommendations from past program reviews, and include trends in error messages for data reported to SDWIS/Fed as well as other data quality indicators. Each section includes a set of recommended next steps for improving SDWIS data quality that apply in general to the Region 9 PWSS programs. We plan to discuss specifics for your program as opportunities arise and include these specifics in the annual grant guidance each fiscal year.

Please let us know if you would like to schedule a separate call to review and discuss the Report contents in more detail. All SDWIS-specific questions should be directed to Don Hodge, Region 9 SDWIS Coordinator at (415) 972-3240 or hodge.don@epa.gov.
